

# AV BMR Sweetleaf SS™

- Brown Midrib, Late-Maturity multi-purpose forage
- Higher palatability, protein and digestibility than conventionals
- Wider window for harvest, high green leaf retention
- Excellent drought resistance, tillering, regrowth, and recovery

CHARACTERISTICS	
Plant Color	Purple
Plant Texture	Juicy
Standability	Excellent
Plant Height	7-8 feet
Panical Type	Sudan
Midrib Type	BMR
Tillering/Regrowth Capacity	Very Good
Grain Color Planted	Red

AGRONOMICS	
Days to 50% Anthesis	90-100
Harvested Grain Tannin	No
Harvest Mode	H/G
Irrigated Tons/Acre	25-30

Planting	
Approximate Seeds/Lb	17000
Lbs/Acre Dryland Row	5-15
Lbs/Acre Dryland Broadcast	15-20
Lbs/Acre Irrigated Row	10-15
Lbs/Acre Irrigated Broadcast	35-40

**IMPORTANT:** Characteristic scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by AgVenture, Inc.. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.
